

RLL2 - adding elegance and improved visibility to the low level environment

RLL2 Step Light

The RLL2 is a low voltage compact deck light available with a stainless steel or solid copper faceplate. Construction includes a galvanized steel, single gang recessed back box with SS fasteners and a diecut neoprene gasket for a tight seal. Natural Copper faceplate is bright polished, untreated copper that will age naturally to a fine dark copper patina.

Benefits

- Durable and lasting construction
- Quick and easy installation
- Fade and abrasion resistant

Features

- Solid copper or stainless steel construction
- Lamp included
- Low voltage quick connector included

Application

- Walkway
