

SlenderForm - low profile, high LED performance

SlenderForm Recessed

The Gardco SlenderForm high output LED Recessed ceiling / canopy luminaire features a sleek, yet powerful, low profile design. The thin 3 inch profile combined with LED high output performance make SlenderForm the ideal choice for exterior ceiling mount and canopy applications. SlenderForm luminaires also provide LED solutions for parking garage applications requiring higher light levels, including entrances, and for garage areas with high ceilings. Gardco's LED technology combines with superior integral thermal control to provide maximized light output and maximum energy savings. SlenderForm is available with integrated Motion Response, providing even greater potential energy savings. Advanced Class 1 LED systems are featured.

Benefits

- Sustained performance
- Uncompromised quality
- Long LED system life
- Increased light output and greater efficiency over HID sources
- Enables intuitive and efficient installation

Features

- Rugged extruded aluminum housing
- Integrated heat sinks
- IP65 rated
- Four unique distribution patterns
- Quick mount plate

Application

- Petrol and Convenience
- Parking Garages
