

Accessory

TriLyte Accessory

TriLyte automatically switches on when sensor detects motion, such as walking or lift truck movement. Luminaire shuts off after no movement has been detected, following a factory-set 10-minute time-delay, which can be manually adjusted from 30 sec. to 20 min.

Benefits

- Save time and effort with the right accessory

Features

- Motion detectors and power packs for TriLyte units

Application

- Office
- Banks
- Hospitality
- Manufacturing
- Arena and Sports
