

OccuSwitch - a smart move

OccuSwitch Classic Wallbox

OccuSwitch wall switch and low voltage occupancy sensors automatically turn lights off when a work space is unoccupied, saving energy and creating a more sustainable work environment. The ceiling mounted sensor communicates with a network of wall switches and dimmers. Using a combination of ultrasonic and passive infrared (PIR) technology, the sensor recognizes room occupancy or vacancy for maximum performance and energy savings.

Benefits

- $\boldsymbol{\cdot}$ Saves energy and lamp life by adjusting light level based on occupancy
- Ceiling and wall mounted sensors communicate with a network of wall switches and dimmers
- · Operates in a wide variety of low and high voltage applications
- · Stylish, low profile design blends into any professional setting

Features

- Uses passive intrared and/or ultrasonic sensing technology to detect small and large motion
- · Fits in standard wallbox space and gangable with other devices
- · Low profile design eliminates obtrusive "scanning-device"
- ·look
- · Convenient push-buttons provides manual on/off light
- \cdot switching at any time

Application

- Office
- Banks
- Hospitality
- Fashion
- Education
