

Mini 300 Stealth DGP333

DGP333 CDM-T150W/830 EB OR SI

DGP333, MASTERColour CDM-T, 150 W, Electronic, Open CT-POT

Mini 300 Stealth is a range of extremely efficient luminaires – with a choice of HID or LED light sources – that can be used to illuminate large areas with direct and/or indirect light. Optimal lighting results are achieved thanks to the good balance of horizontal and vertical light levels combined with the white light and good color rendering of the light sources. Mini 300 Stealth is supplied with an asymmetric medium-beam, wide or narrow-beam reflector. It is also available with the road-lighting POT optic, making it suitable for site perimeter, parking and open area lighting. The light source is shielded by a patented louver system, minimizing glare. Mini 300 Stealth is suitable for pole mounting (DGP333), wall mounting (DWP333) or floodlighting (DVP333). Mini300 Stealth is also available in LED versions for pole mounting (BGP333), wall mounting (BWP333) or floodlighting (BVP333). Within the Mini 300 product family there is also a dedicated under-canopy version (Mini 300 Cube and Mini 300 LED), e.g. for petrol-station applications.
