

# Maxos, TL-D IP64 trunking

## 9MX056 CP BK

### Coupling piece

The IP64 trunking sections are made of hot-dip galvanized steel with a white powder coating. They are available in lengths of 1, 2 and 3 electrical units 36 and 58 W. Special seals between the sections and waterproof trunking end-pieces are used (please order separately). A flat ribbon cable (5 or 7 wires) is integrated in the trunking and guarantees (in combination with an integrated phase selection switch and contact blocks) safe and correct cabling. The 7-wire cable is used to integrate light regulation or emergency lighting for those electrical units that are equipped with emergency battery packs. Hence, no extra contact blocks or wiring need to be installed. For suspended light-lines, the trunking sections are connected using the integrated electrical connector and a sturdy external mechanical coupling piece (accessory). Surface-mounted light lines use the same integrated electrical connector and an internal coupler (accessory). On the upper part of the trunking section, special knock-out openings enable cable entry wherever needed. The IP64 trunking can be equipped with special IP64 electrical units and different reflectors. The outstanding stability of the sections and coupling pieces allows suspension intervals of 3.4 to 4.8 m.

### Product data

General Information	
Protection class IEC	-
Suspension accessories	Coupling piece
Mechanical accessories	-
Packaging configuration	-
Accessory color	Black

Emergency lighting accessories	-
Product family code	9MX056 [ ACC MAXOS]
Light Technical	
Optical cover/lens type accessory	-
