# BVP506 GRN107-3S/740 I DM T35

## OptiFlood LED, LED GreenLine 10700 lm, Distribution medium

OptiFlood LED is a range of stylish, extremely efficient asymmetric floodlights that can be used to illuminate large areas. Designed around the latest LED technology, it offers significant energy and maintenance savings compared with conventional HID systems. Thanks to its highly efficient LEDGine area optics, it can be used for area lighting applications that have traditionally required HID-equivalent power levels. Integrated controls are available as an option, enabling additional energy savings. And LED upgrades can be easily incorporated, making this a truly future-proof solution. With its compact shape and aesthetically pleasing design, OptiFlood LED can be used in applications where design and appearance are just important as technical performance.

#### **Product data**

| General Information      |                                           |  |
|--------------------------|-------------------------------------------|--|
| Lamp family code         | GRN107 [LED GreenLine 10700 lm]           |  |
| Light source replaceable | Yes                                       |  |
| Number of gear units     | 1 unit                                    |  |
| Driver included          | Yes                                       |  |
| Photocell                | -                                         |  |
| Remarks                  | *-Per Lighting Europe guidance paper      |  |
|                          | "Evaluating performance of LED based      |  |
|                          | luminaires - January 2018": statistically |  |
|                          | there is no relevant difference in lumen  |  |
|                          | maintenance between B50 and for           |  |
|                          | example B10. Therefore, the median useful |  |

|                          | life (B50) value also represents the B10 |
|--------------------------|------------------------------------------|
