BGP615 LED22-4S/757 PSR I DX10 GR CLO D1

LUMA MICRO, LED module 2200 lm, 757 cool white, Power supply unit regulating, Safety class I, Distribution extra wide 10, Grey, Spigot for diameter 62 mm

Luma is a REVOLED[™] road-lighting luminaire with a clear design identity, offering a perfectly cooled, fit-and-forget solution for all streets and roads. The lumen package, lifetime and energy profile can be tuned to create the desired solution in terms of energy and cost savings. Luma can be programmed to keep the flux of the LEDs at a predefined constant level over the lifetime of the luminaire – by increasing the operating current over time to compensate for the LED lumen depreciation. This eliminates over-lighting at the beginning, enabling additional extra energy savings. Luma's truly flat design prevents upward light, and the OPTIFLUX[™] lens optics meet current lighting standards. To optimize the light distribution for varying road geometries and/or glare restrictions, the tilt angle can easily be adjusted on installation.
