

Dynalite System Integration

DDMIDC8-NA

Within any modern project, many third-party systems can be found performing different roles. Each separate system may use a different protocol for communication. Philips Dynalite has developed a range of gateway devices that can be used to synchronize these systems' functions into one integrated system solution. By utilizing the correct gateway, different systems can be integrated, allowing end-users access to a fully automated site from one interface. By successfully integrating third-party systems with a Dynalite solution, repetitive end-user interaction is reduced.

Dynalite System Integration

General Information

Remarks	Please download the Lighting - Product Data Sheet for more information and ordering options
----------------	---------------------------------------------------------------------------------------------

Product Data

Order product name	DDMIDC8-NA
---------------------------	------------

Numerator – quantity per pack	1
--------------------------------------	---

Numerator – packs per outer box	1
----------------------------------------	---

Material no. (12NC)	913703580209
----------------------------	--------------

Net weight (piece)	0.270 kg
---------------------------	----------
