

Dynalite Integration Devices

DDNG485-NA

Within any modern project, many third-party systems can be found performing different roles. Each separate system may use a different protocol for communication. Philips Dynalite has developed a range of gateway devices that can be used to synchronize these systems' functions into one integrated system solution. By utilizing the correct gateway, different systems can be integrated, allowing end-users access to a fully automated site from one interface. By successfully integrating third-party systems with a Dynalite solution, repetitive end-user interaction is reduced.

Product data

General Information		Order code	
Remarks	Please download the Lighting - Product Data Sheet for more information and ordering options	Material Nr. (12NC)	913703581009
Product Data		Numerator - Quantity Per Pack	1
Order product name	DDNG485-NA	Numerator - Packs per outer box	1
Full product name	DDNG485-NA
