

# Dynalite System Integration

## DDNG485-NA

Within any modern project, many third-party systems can be found performing different roles. Each separate system may use a different protocol for communication. Philips Dynalite has developed a range of gateway devices that can be used to synchronize these systems' functions into one integrated system solution. By utilizing the correct gateway, different systems can be integrated, allowing end-users access to a fully automated site from one interface. By successfully integrating third-party systems with a Dynalite solution, repetitive end-user interaction is reduced.

### Product data

## Dynalite System Integration

---

### General Information

<b>Remarks</b>	Please download the Lighting - Product Data Sheet for more information and ordering options
----------------	---

---

### Product Data

<b>Order product name</b>	DDNG485-NA
---------------------------	------------

---

<b>Numerator – quantity per pack</b>	1
--------------------------------------	---

---

<b>Numerator – packs per outer box</b>	1
--	---

---

<b>Material no. (12NC)</b>	913703581009
----------------------------	--------------

---

<b>Net weight (piece)</b>	0.202 kg
---------------------------	----------

---
