

Sony digital cinema projectors

XDC 2000 S

Digital Xenon Cinema S-type lamps are ideal for today's demanding 3D and 2D digital cinema presentations. There is a choice of three power ratings in the S-type Digital Cinema Xenon lamps range: 2000W, 3000W, or 4200W. These lamps produce the very high light output needed to maximize screen brightness and enhance the dramatic effect for the viewer. These long-life digital lamps also provide constant color temperature characteristics, and meet all of the stringent arc-stability requirements for consistent customer satisfaction. In addition to S-type Digital Cinema Xenon lamps there are B-, C-, N-, and TA-type Digital Cinema Xenon lamps. These are all individually customized per projector, so there is a different, perfect-fitting lamp for each projector model to ensure optimized projector performance.
