

Avalume Area

Avalume, Type V Vertical Lamp, 400W, PS

Avalume, Type V Vertical Lamp, 400W, PS

The Avalume is a rectilinear area luminaire defined by its sleek rounded profile and rugged construction. The housing is one-piece, diecast aluminum and mounts directly to a pole or wall without the need of a separate support arm. The multifaceted arc-image duplicating optical systems provide IES Types III and IV distributions. The door frame is single-piece diecast aluminum and retains an optically clear tempered flat glass lens. The luminaire is completely sealed and gasketed preventing intrusion from moisture, dust and insects. The Avalume luminaires are finished with a fade and abrasion resistant TGIC powdercoat.

Product data

General Information	
Lamp Watts	400
Number of Lamps	1
Photometric Distribution Type	Type V
Mounting	Pole Arm
Operating and Electrical	
Voltages	120/208/240/277/347/480/UNIV V
Mechanical and Housing	
Shape	Square
